### Projects

#### 1. Automatic Job Hunting

- Project Title: Automatic Job Hunting
- Problem Statement: Finding relevant job openings and applying for them can be a time-consuming and repetitive process.
- Proposed Solution: We have developed a GUI that simplifies job hunting by automating tasks of searching for jobs .
- Project Highlights: The application allow users to enter a URL, potentially from a job board website. It then retrieves job postings and displays them in a table format, details like title, company, and location. This could significantly reduce the time spent searching for jobs.
- Technologies Used: Python libraries- pandas, BeautifulSoup, bs4, requests, tkinter.
- Skills: Python (Programming Language) · BeautifulSoup · Computerized System Validation (CSV) · request · Data Analysis
